1.16.1 is a minor update to Java Edition released on June 24, 2020, which fixes stability issues with Realms.. This update overhauls the Nether by adding four new biomes, four new mobs (the piglin, hoglin, zoglin, and strider), and a multitude of new blocks, including many variants of blackstone as well as the respawn anchor used to set the player's spawnpoint in the Nether.. It also adds a new netherite tier of equipment, obtained through ancient debris found rarely throughout the Nether.. At first, people built structures to protect against nocturnal monsters, but as the game grew players worked together to create wonderful, imaginative things.
